

# Count Your Clothes Activity Card

Combine your child's mathematical understanding with their morning routine of getting dressed – making the task of getting dressed in the morning fun and quick.

## WHAT DO I NEED

1. Large numerals 1-6 (can be numbers written on paper)
2. Dice with spots or numbers
3. Clothes laid out with 1-6 numbers on them (have ready a second set of numbers)

## METHOD

1. Ask your child to roll the dice and support them to recognise the number they rolled
2. Can your child find the piece of clothing with the corresponding number on it? (If they need support you can hold up the matching number and count with them, so they can understand what to look for)
3. Keep rolling until your child is dressed (some rolls may need to be done twice, for example if your child rolls for trousers before their underwear)
4. If your child has a sibling they can join in as well and taking turns.
5. Make sure to support them with fastenings and encourage them to try themselves after you have demonstrated
