

Counting Pegs Activity Card

This activity will support your child to count and recognise numbers. It will support their understanding of one to one correspondence which is the ability to match an object to a corresponding number and recognise that numbers are symbols that represent a quantity.

WHAT DO I NEED

1. Paper/card
2. Pencils/pens
3. Pegs

METHOD

1. Support your child to make the number cards (You could start with 5 and then extend up to 10)
2. Encourage your child put the correct number of pegs around each card
3. This could be extended by making a washing line and pegging the number cards in the correct order
4. You could ask your child to find/count items of clothing for example: 1 coat, 2 shirts, 3 jumpers etc
