

# What's in the Box Activity Card

A fun memory and communicative game to encourage your child to describe what they feel and match it to the correct object in the box.

## WHAT DO I NEED

1. A cardboard box with a hole in the side
2. A collection of five or more household objects

## METHOD

1. Discuss your collection of objects before putting them into the box
2. Encourage your child to reach into the box and find an object
3. Can they describe the object they are feeling before they name it - i.e. "It's soft and round, I think it is the ball."
4. Your child then removes the object from the box to see if they were correct
5. Whose turn is it next?
