

Malleable Play: 1 Fluffy Slime

For this slime you only need 3 simple ingredients (that you can probably find around your home). We love that this fluffy slime is made without borax. You can also add any colour you'd like (or even mix them to encourage your child's colour recognition)

WHAT DO I NEED

1. A 4 ounce bottle of white school glue
2. Two tablespoons of contact saline solution (or liquid laundry detergent)
3. 1 - 2 cups of shaving cream
4. Food colouring (optional)

METHOD

1. Place the glue in a plastic bowl.
2. If you're going to add food colouring, do it now
3. Once it is your desired colour add the saline solution and mix until combined
4. Stir in 1-2 cups of shaving cream (the more you add the thicker it will be. The less you add the slimier it will be). We usually end up adding about 1 1/2 cups at nursery
5. Stir until you can no longer stir and then kneed it with your hand
6. It will be sticky at first but keep moving it with your hands until it is no longer sticky and is the right consistency
