

Fluffy Pumpkin Slime Activity

The perfect sensory activity for your little ones to explore and mould during this spooky season!

WHAT DO I NEED:

- 1/2 Cup White School Glue
- Unscented Shaving Cream
- Orange Food Colouring
- Scissors
- Saline Solution
- Baking Soda
- Pumpkin Scented Oil (optional)
- Mason Jar (optional)
- Black Construction Paper (optional)

METHOD

- Add 1/2 cup of white school glue and 4 cups of shaving cream to a bowl. Mix well then add drops of orange food colouring. Stir to mix the colour.
- Optional: You can add in a few drops of pumpkin scented oil after you mix in the food colouring.
- Stir in 1/4 tsp of Baking Soda and 1 tablespoon of contact solution at a time and mix.
- Keep adding a little more contact solution and mixing until your slime begins forming into a ball-like shape. You'll notice this is when it starts to turn into slime and becomes less sticky. It will begin coming off the sides of your container and sticking together.
- If your slime is still sticky add some more saline solution by starting small and adding a little as you go and continue to knead it.
- The slime will take on a fluffy marshmallow consistency that is so addicting to play with!
